

Over hver opgave kan du se de fire figurer der skal benyttes. Opgaven består af 16 felter eller celler fordelt på 4 vandrette rækker og 4 lodrette kolonner, der igen er samlet i 4 blokke, hver med 2 gange 2 felter. Det gælder om at placere de forskellige figurer således at hver række, kolonne og blok indeholder hver figur én gang.

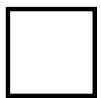

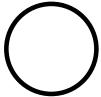

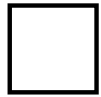

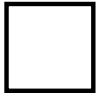

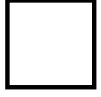

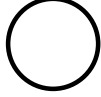

|                                                                                     |                                                                                   |                                                                                   |                                                                                     |
